

TESTIMONIALS

My coaching session with Karen was amazing!

She gathered and assessed a lot of information about me - not only my behaviours; desires; relationships and performance etc but she also used my astrological birth-chart to help determine my path.

I felt that she really understood who I truly am. I was blown away when she spoke of my deepest personal struggles regarding very important decisions I have to make over the next months. I left the session feeling more at ease about the changes I long to make.

I immediately set up another appointment with Karen, for my life partner and I, because I wanted her to do a compatibility chart for us. I wasn't sure how B (my life partner) would feel about an astrological chart but as it turned out, he was as thrilled as I was. Our session was great because Karen didn't only tell us how compatible we are in every respect - she also helped us to see areas for concern. We were both amazed at the truths uncovered and it was lovely to get confirmation that we belong together!

I was feeling very unsettled about an operation I needed to have and decided to consult with Karen. She read my chart and advised me to postpone the operation. A few days later I was hospitalised with meningitis.

The doctor said that had I undergone the ear operation, my life would have been at risk. My scepticism of astrology changed forever.....and I have Karen to thank for being here today.

I regard Karen Moss as South Africa's most incisive and accurate astrologer. Her monthly readings were massively popular with our readers, many of whom regularly wrote to us to tell us that they bought the magazine expressly for her horoscopes.

Consequently, she has built up one of the most credible reputations in the country; she is widely published and has garnered a huge, well-deserved following. Many have turned to her privately for more personalized charts.

She continues to seek more interesting and imaginative ways of presenting her predictions and is constantly working her craft, and for that she has my ongoing admiration.

Clare o'Donoghue,
